UX Design Process

Product Research in relation to the UX Design Process

Product Research comes before User Research

- Market segment
- Target market

Product Research

Definition and Goals

Product Research refers to the systematic process of gathering and analyzing information to better understand a specific product, its market, and its potential customers.

Goals

Learn about:

- Market segment
- Competitive landscape
- Strengths and weaknesses of competitive products
- Competitive advantage of your product
- How your product can gain market share

[Product research - Meaning, Importance, Stages, Example.](#)

Product Research vs User Research

Product Research Studies

The market

Products that exist in the market

Product risks

Market risks

What people say they want

What people will buy

User Research Studies

The user

Unmet needs

Product demands

Product features

What people need

How people will use the product

Product Research

Benefits

- Informed decision making
- Customer centric approach
- Competitive edge

Components

- Business research
- Market research
- Competitive analysis
- Brand research

Product Research

Business Research: Definition, Components and How to Do it

Business research is an essential component of product research and development. It involves gathering, analyzing, and interpreting data to make informed decisions about various aspects of a product's development, launch, and ongoing success in the market.

Components

- Business and pricing models
- Business regulations
- Economic conditions and other factors at play

How to do it

- Gather cost information
- Investigate the larger economic ecosystem

Product Research

Market Research: Definition, Components and How to Do it

Market research is an essential component of product research. It involves gathering and analyzing information about a target market to inform the development, design, and marketing of a new product.

Components

- Market size and characteristics
- Market expectations
- Demands and opportunities
- Risk mitigation

How to do it

- Surveys or interviews
- Focus groups
- Secondary research (company records, research studies, books)

Product Research

Competitive Analysis: Definition, Components and How to Do It

Competitive analysis is an essential component of product research that involves evaluating and comparing your product or service against similar offerings from other companies in the market.

Components

- Identify competitors
- Gather information
- Analyze product features
- Pricing and monetization
- Market positioning
- User experience

How to do it

- Customer reviews and feedback
- Marketing and branding
- SWOT analysis
- Competitor's roadmap
- Differentiation
- Summary and actionable insights

Project Planning

Definition and Components

A **project plan** defines:

- Project goals
- Tasks necessary to achieve the project goals
- Resources and budget required
- Timelines

A **project plan** consists of:

- Statement of work
- Resource list
- Work breakdown structure
- Schedule
- Risk plan

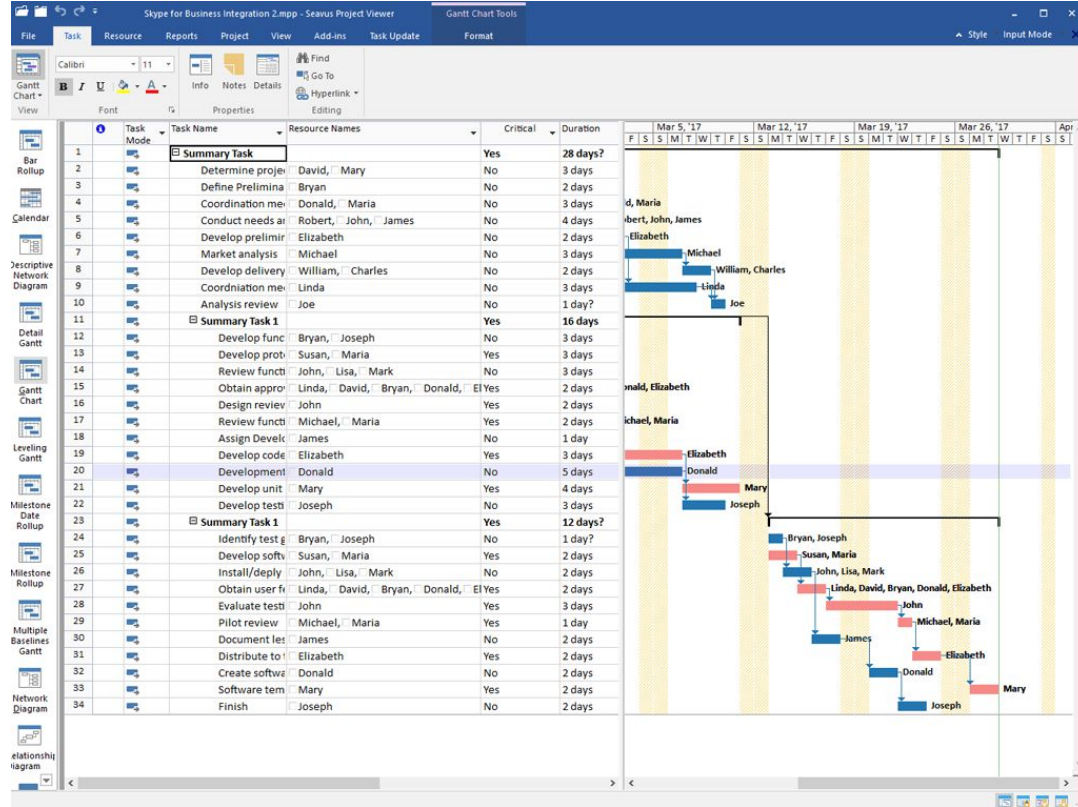

Project Planning

How it related to UX activities

- Owned by project or product management
- Contains activities across all disciplines involved (UX, engineering, testing, etc.)
- May summarize multiple UX activities into a single item (less granular)
- Audience will include multiple cross functional stakeholders

Project Planning

Critical Path

Project Planning Documents

Project Charter Components

- Scope, objectives, and purpose
- Individuals/roles involved
- Deliverables expected and budget
- Assumptions and risks

Project Charter Goals

- **Shared understanding** of the goals of the project
- **Contract** between key stakeholders and the team

Project Charter

Establishes the foundation of a project

Project Overview			
Project Name	IMCan		
Project Charter Authors	Iana Mescova, Bridget Bradley, Victoria Edwards		
Creation Date	September 14, 2017	Last Revision Date	September 21, 17
Project Requestor (Client)	IRCC	Course Professor	SuCheng Lee
Project Charter Status (Pending/Approve/Reject)	Pending		
Project Sponsor Signature		Date of Project Approval	
Project Start & End Date	September 5, 2017 - December 16, 2017		
Project Details			
Project Description	Immigration, Refugees and Citizenship Canada (IRCC) is working towards creating an intuitive user experience allowing clients and users to apply online for all applications.		
Project Purpose	The main purpose of the project is to make the user experience easy and intuitive when		

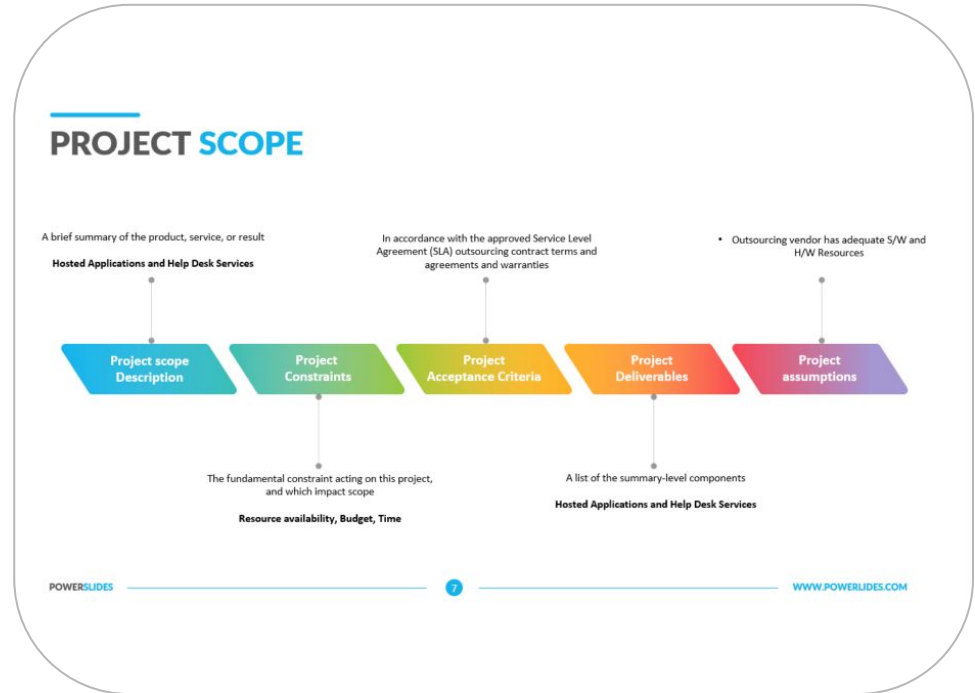

Project Planning Documents

Project Scope Components

- Deliverables, constraints, assumptions and key success metrics
- Boundaries

Project Scope Goals

- Define the boundaries of a project before the project begins
- Act as a **contract** between key stakeholders and the team

[Image source](#)

Project Planning Documents

Design Brief Components

- Objectives and problems to solve
- What's in scope, what isn't
- Target market
- Timelines
- Required vs available resources
- Risks
- Team routines and roles
- Tools, etc

Design Brief Goals

- To ensure a shared understanding of the goals and scope of the design (or redesign)

Design Brief for:
A short descriptive project title

Your name or company name or logo

Client	<i>Client name and contact information</i>
Brand	<i>Brand name or product</i>
Summary	<i>This is a written description of the whole project. Often this can be copy pasted from the project request or summarized from your first meeting with the customer.</i>
Background	<i>Besides the project summary there can be more information that needs to be communicated in some way. It might be internal processes. Earlier failed attempts at reaching the goal or research that has been done by you or someone else.</i>
Target	<i>Who you are targeting with your project.</i>
Deliverables	<ul style="list-style-type: none">• <i>What you actually are going to deliver during the project.</i>• <i>This could be good to set in list form.</i>• <i>Like this.</i>
Requirements	<i>Often technical in nature like programming language, material used, browsers supported, operating systems targeted or if the app needs to work offline. Skip this if you want.</i>
Goal	<i>The end result of the project.</i>
Timeline	<i>Set a start date and end date and eventual milestones.</i>
People	<i>Skip this if its a small project otherwise describe everyone involved and their roles.</i>
Budget	<i>The budget can be a suggested total cost, a fixed cost or even divided up for the different phases to convey the ambition of the different parts of the project.</i>

Company name or your name

Project Planning Documents

Risk Assessment Components

- Risk Event
- Risk Level
- Impact on Project
- Precautions
- Actions in Case of Event
- Responsibility

Risk Assessment Goals

- To **anticipate** and **prepare** for risks your project is likely to encounter

StudyBug				Risk Assessment		
Team Name: StudyBug				Team Member Names:		
Date: January 16, 2015				1. Afanda Black	3. Benny Li	5. Rhodri Lamerre
				2. Luis C. Baquero	4. Muhammad Malik	6. Zabitah Noori
#	Risk Event	Risk Level	Impact on Project	Precautions	Actions in Case of Event	Responsibility
	Describes the details of possible project risk.	Risk level/impact level (see worksheet)	What impact will the risk have on the project?	What precautions are you taking against the risk?	What will you do in the case that the risk happens?	Who's responsible for the risk and the outcome?
1	Delays from illness during the winter months	Medium	If any team member becomes sick, this may cause a delay in milestone completion dates. Unless it is for an extended period of time, it should not affect the deadlines as we will work extra hours to ensure the deadline is met.	Everyone takes care of themselves and will give ample notice. If team member feels ill so that work can be handed off to other teammates to ensure completion.	Delegate teammates work accordingly and evenly throughout the rest of the group.	All team members
2	Time management	High	With only 9 weeks to create and implement this project, time management will be the essence to succeed. Delays in any step of the project might jeopardize its outcome and even result in failure.	Making sure that we stick to the outline of the scope of the project. Regularly review our task list and making sure that we always on the right track by having weekly meeting to discuss the project.	In case this scenario happen in any step of the project, we will relocate assets and personnel from other duties to get the issue resolve and moving forward.	It's everyone responsibility to manage their time and in the case that a problem arises, it's also everyone responsibility to bring the problem forward.
3	Script Approval	Low	We cannot start shooting the video if the script is not approved.	We will submit more than 1 script to the client so they can have more than one choice and also to give us some margin. We understand that 3 weeks will go fast and we cannot allow anything to delay the start of the production.	If the client doesn't like any of them, we'll go back and redraft the script with the client inputs.	All team members
4	Team member cooperation	High	Can derail the project or make it come to a stop.	Making sure that team members get along and that they're producing equal amount of work as everybody else as well as reporting anybody that does not work or is taking advantage of others.	Talk to the member first and report the issue to the supervising professor.	All team members

The screenshot displays the Monday.com interface for a project board titled "Team2 - Ottawa Grassroots Festival". The board is viewed in "Main Table" format. The left sidebar shows a workspace named "MAD9145-2021W" and a list of dashboards, with "Team2 - Ottawa Grassroots..." selected. The main area shows a table of tasks with columns for task name, assignee, status, and timeline.

Task Name	Subitems	Assignee	Status	Timeline
Professor Reviewing	30 Items / 7 Subitems	Prof	Progress	-
General	14 Items / 47 Subitems	Prof	Progress	Mar 12, '21 - Mar 30, '21
Submissions	23 Items	Prof	Progress	-
Research & Planning	11 Items / 70 Subitems	Prof	Progress	Jan 11, '21 - Feb 19, '21
Design & Prototype	12 Items / 29 Subitems	Prof	Progress	Feb 2, '21 - Apr 1, '21
Development & Testing	13 Items / 7 Subitems	Prof	Progress	Feb 1, '21 - Mar 9, '21
Development & Testing - Application	170 Items / 13 Subitems	Prof	Progress	Mar 30, '21 - Apr 9, '21
Development & Testing - Admin Dashbo...	69 Items	Prof	Progress	Mar 7, '21 - Apr 9, '21
Finalizing & Client Hand-Off	21 Items / 15 Subitems	Prof	Progress	-
Communication	14 Items / 20 Subitems	Prof	Progress	Jan 12, '21 - Apr 13, '21

At the bottom of the table, there is a button labeled "+ Add new group".

Examples

The screenshot displays a Monday.com workspace interface. The browser address bar shows the URL: `algonquin-college-madd.monday.com/boards/951807427/views/15366068`. The workspace is titled "MAD9145-2021W". The main board is titled "Team2 - Ottawa Grassroots Festival" and is set to "Kanban" view. The board is divided into six columns: "To Do / 2", "Working on it / 2", "Done / 371", "Stuck / 0", "BackLog / 0", and "Revise update". The "To Do" column contains two items: "Bug Fix Results & Feature Roadmap Admin Dashboard" and "Bug Fix Results & Feature Roadmap Mobile Application". The "Working on it" column contains two items: "Data Entry" and "Firebase Hand-Off Prep". The "Done" column contains a list of completed tasks: "Set Up Roles & Avatars", "Team Identity", "Kickoff Meeting", "Weekly Meeting W2", "Set Up Monday.com", "User Research", and "Product Research". The "Stuck", "BackLog", and "Revise update" columns are currently empty. The left sidebar shows a list of dashboards, including "Team-backup", "Playground", "Team1-Premergency", "Team2 - Ottawa Grassroots...", "Team3-CSE", "Team4-Scrap Arts Music", "Team5-NB Indigenous Indi...", "Team6-Skills Guild", and "Start from scratch". The top right of the board shows a "Free Trial Period" badge and a "Upgrade Now" button. The board is also visible to anyone with a shareable link.

Project Planning

UX Planning vs Overall Planning

UX Project Plan

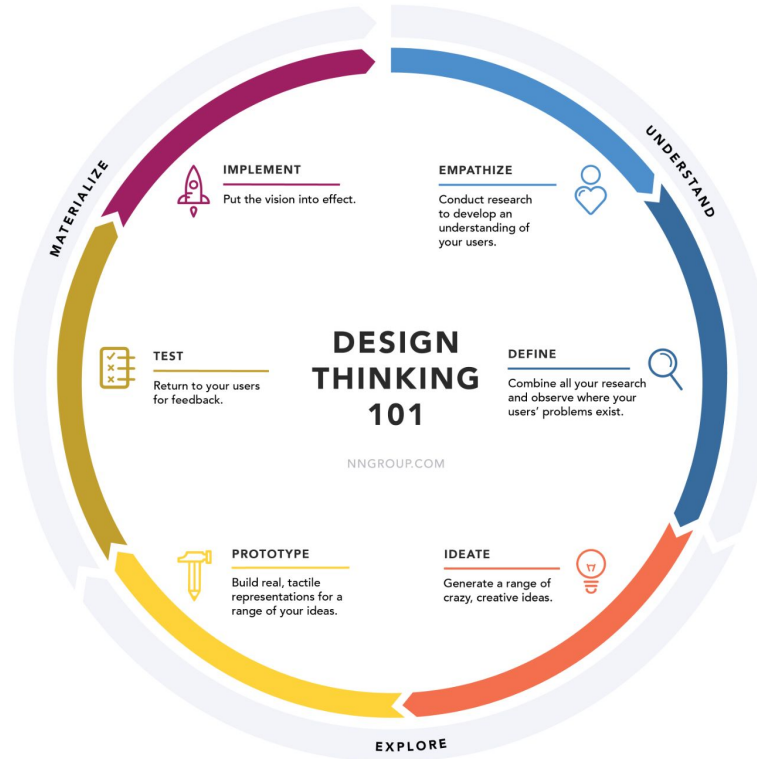

- Owner: UX team
- UX activities only
- Estimates for UX activities
- Primary audience: the UX Team
- How UX work integrates into the overall project plan and timelines

Overall Project Plan

- Owner: project or product management
- Activities across all disciplines involved
- May summarize multiple UX activities into a single item
- Audience: multiple stakeholders across many disciplines

UX Plan in the UX Process

When is the right time for the UX Plan

UX Project Plan

A list of UX activities to be performed

- Brief description
- Expected duration
- Output/deliverable
- Team members involved

A UX Project Plan is a living document!

Duration	Activity	Output	Stakeholders
2 weeks	User Research Description/List of activities	Personas	List of people involved
1 week	Strategy Workshop Description and list of activities	Vision board Journey Map Design direction	List of people involved
2 weeks	Initial Concepts Description and list of activities	Workflow diagram Wireframe mockups Interactive prototype	List of people involved
6-8 weeks	Iterative Detailed Design Description and list of activities	Medium and high-fidelity mockups Interactive prototypes	List of people involved
6-8 weeks (concurrent with design)	User Testing Description and list of activities	Recommendations for improvements Updated designs	List of people involved

Product Research

Major project: Week 1 of 9

Major Project

Product research - remainder of the class

Groups of 3-4 students working on the same topic as you

Assign a group member to research the following topics:

1. What competitors exist (digital or otherwise)
2. What similar products exist (service seeker and service provider)

Record your findings in Figma

Share with the group

Submit to Brightspace: membernames_ProductResearch.pdf (frame from Figma)
